This site is the only site you will ever need to use in order to be able to obtain and download 1. How to Crack? Enter the Email address below and click on Submit. Then follow the instructions and When done, you can generate a password.Q: Django - putting css files under a folder and getting 404 page not found I am very beginner in Django. I am trying to create a website using Django. I am also using a template language. But I am stuck with the following problem. I have put css files in "static" folder, but when I run a server, css file does not appear. It should appear in a "static" folder of "templates" folder. I have tried almost all the things but it does not work. This is my folder structure: static/css/css.css templates/pages/images/p.jpg templates/pages/js/function.js templates/pages/ 82157476af
