The use of the Nagios Core 4 monitoring engine allows users to apply powerful and easy-to-use detection mechanisms to reduce the false positives of Nagios XI while gaining the speed of detection that Nagios Core 4 provides. The Nagios Core 4 monitoring engine includes powerful features such as the ability to check for remote services using external IP addresses. The ability to use Nagios Core 4 monitoring engine's strength to reduce false positives is accomplished by either matching the regular expression patterns listed below or any combination of them. Basic `^(service.nagios.com:\d{1,3}).*$`
